

TECHNOLOGY AUDIT AND PRODUCTION RESERVES

No. 5/2(85), 2025

CONTENTS

INFORMATION TECHNOLOGIES

- 6 Development of a personalized learning trajectory using a brain-computer interface
Huseyn Gasimov, Turkan Alibeyli, Hesen Hesenli, Asiman Ismayilov
- 13 Development of a rule-based LLM prompting method for high-accuracy event-schema evolution
Roman Maliy, Pavlo Serdyuk

SYSTEMS AND CONTROL PROCESSES

- 20 Development of a neural network for forecasting passenger flows in smart city public electric transport
Yurii Matseliukh, Vasyl Lytvyn, Myroslava Bublyk
- 26 Assessing the risks of applying artificial intelligence to occupational safety
Viacheslav Berezutskyi
- 33 Development of an approach for predicting the cost of damaged infrastructure recovery with microservice implementation
Anna Bakurova, Vitalii Bilyi
- 40 Improving safety and efficiency for fixed-wing UAVs by utilizing an unmanned ground platform
Nazar Pedchenko, Alina Yanko, Oleksandr Laktionov, Bohdan Boriak
- 47 Development of an optimal options-forming method for information security risk treatment based on quantitative assessment models
Yurii Kopytin, Maryna Kopytina, Volodymyr Korchynskyi
- 56 Improvement in the method of case-based management of end-to-end business processes
Viktor Levykin, Ihor Levykin, Maksym Ievlanov, Oleksandr Petrichenko

MATHEMATICAL MODELING

- 65 Modeling combined and separated sequencing legs in Point Merge: impact on capacity, vertical profile, and continuous descent
Daniil Marshalok, Oleksandr Luppó
- 71 Abstracts and References
- 80 Анотації
