

TECHNOLOGY AUDIT AND PRODUCTION RESERVES

No. 2/2(88), 2026

CONTENTS

INFORMATION TECHNOLOGIES

- 6 Development of an approach to forming a frame-based dictionary for the personalization of an educational chatbot
Olha Kryazhych, Vasyl Vasenko, Oleksandr Vasenko, Anastasiia Pavlenko, Kateryna Iushchenko
- 15 Proof-of-Indicators: development and validation of an adaptive consensus mechanism for internet of things blockchain networks
Leonid Chepel, Yuriy Boyko
- 25 Development of a hybrid method VGG16-FrostNet for adaptive despeckling of synthetic aperture radar (SAR) images using attention mechanism and differentiable Frost filter
Raed Al-Senaikh, Oleksii Rubel
- 34 Developing a task allocation model for remote health monitoring in smart cities considering latency, energy consumption, and privacy on Fog nodes
Ivan Shevtsov, Tetiana Fesenko

SYSTEMS AND CONTROL PROCESSES

- 48 Development of a hybrid fuzzy decision support system for assessing the effectiveness of artillery fire in conditions of uncertain disturbances
Maksym Maksymov, Oleksiy Kozlov, Oleksiy Maksymov, Ruslan Riaboshapka
- 58 Identification of the characteristics of control signal generation for implementing the traction mode of a physical model of magnetic levitation transport
Yehor Chupryna, Andrii Mukha, Serhii Plaksin, Dmytro Ustymenko, Oleh Bondar, Oksana Marenych, Oleksandr Holota, Andrii Antoniuk
- 66 Development of a parameter-efficient method for biomedical image synthesis by substituting text conditioning with pathology foundation model embeddings in latent diffusion
Sergii Kuzmin, Oleh Berezhsky
- 76 Identification of influential railway stations using local synchronization in complex networks of train formation plans
Andrii Kyman, Andrii Prokhorchenko, Mykhailo Kravchenko, Mykhailo Muzykin
- 84 Development of a method for adaptation of radioacoustic sounding systems of the atmosphere to the meteorological conditions
Volodymyr Kartashov, Igor Kondrashov, Olexander Kartashov, Roman Bobniev, Anton Shamrai
- 92 Development of a decision support model for multi-stage investment decisions in production systems under risk
Oksana Mulesa, Olga Kachmar, Svitlana Baloha, Hanna Tiutiunykova, Dmytro Shevchuk
- 98 Development of a hybrid artillery fire control system based on neural networks and uncertainty quantification methods
Yurii Rubel, Yurii Hrytsiuk
- 106 Abstracts and References
- 119 Анотації
